

IN THE SPECIFICATION:

Rewrite the paragraph as follows:

[0071] It will be appreciated that many of the modules illustrated in FIG. 6 can be located on a remote computer. For example, some embodiments of the present application are web service-type implementations. In such embodiments, user interface module 546 can reside on a client computer that is in communication with computer 502 via a network (not shown). In some embodiments, user interface module 546 can be an interactive web page that is served by computer 502 to the client computer. Further, some or all of the components of visual interpreter module 556 can reside on the client computer so that the results of a query are displayed on the client computer. Thus, the present invention fully encompasses a broad array of implementations in which one or more users can explore one or more databases 558 using the techniques and methods of the present invention from a remote site. The illustration of the modules in FIG. 5 in a single central computer is merely presented to concisely illustrate certain software modules and data structures that are used in various embodiments of the present invention and in no way is limiting. Those of skill in the art will appreciate that numerous other configurations are possible and all such configurations are within the scope of the present invention.
